

Truth in Evaluation

Mid-Term Conference of
The Italian Society for Analytic Philosophy

University of Sassari
26-28 September 2022 | Alghero

A wide range of past and present philosophical discussions focus on the relation between truth and evaluative discourses, namely those expressing positive or negative assessments of things, actions, and events through notions such as right, wrong, good, bad, beautiful, or ugly. The conference aims to provide a satisfactory account of the nature and semantics of evaluative discourses across different philosophical areas.

Keynote speakers

- Carla Bagnoli**
University of Modena and Reggio Emilia
- Julian Dodd**
University of Leeds
